

## Professional Microphones with Built-in Sound Processing

It's like having your own expert sound tech in the handle of your mic!

*"Our Sennheiser mics have stayed in the closet since the Lampifier mics arrived..."*

*—Tom Flaten, Christ the King Church*

### The World's Most Convenient Live Performance Microphone

No extra patch cables. No outboard sound processors. Faster setup. Enter the convenient "no rack zone" with polished and professional sound. The Lampifier Microphone is a high-quality wired microphone with a programmable, audio-enhancing processor inside the handle.

Total system cost is significantly reduced by including the sound processor internally. A Lampifier Microphone with its internal processor costs about the same as an ordinary professional microphone.

The audio processor is pre-programmed for the user's application. The processor self-adjusts to incoming sound, making adjustments by the user generally unnecessary. The user also can re-program the processor for other applications with the help of the free online programming tool at [www.Lampifier.com](http://www.Lampifier.com).

### Key Features and Benefits

- **Built-In Professional Audio Processing**  
Self-adjusting, patent-applied-for processor inside the microphone.
- **Phantom Powered**  
No batteries required. Plugs into any phantom powered mixing console or amplifier with an ordinary microphone cable.
- **Lower Overall Cost**  
Microphone with internal sound processor costs about the same as an ordinary professional microphone.
- **Ready to Use**  
Pre-programmed and ready to go. Just plug it in and play!
- **Polished, Professional Sound**  
Dynamics are intelligently controlled at all sound levels from soft to loud, giving better articulation and clarity.
- **Less Feedback**  
The sound processor blocks low level feedback and decreases high level feedback.
- **Loud & Clear Sound**  
Helps vocals and instruments cut through the mix.
- **User Programmable**  
May be re-programmed for different applications.

*"This mic kicks a\*\*! At high volume my voice is much easier to control..."*

*—Scott Yanke, Second Soul*
